Rock Systems Model 108
Portable & Stationary
Blending Hopper/Cold Feed Bins

Hoppers
Each hopper is 9'-6" wide x 14' long with 20 tons storage capacity constructed of 1/4" thick steel plate with reinforcing; self-relieving tapered hopper bottom opening to minimize bridging; full length skirtboards with adjustable rubber flashing to prevent leakage between hopper bottom and belt feeder; adjustable discharge gate to control material flow from each hopper.

Feeders
Each belt feeder is 30" wide x 8' long with fixed speed 5 h.p. electric motor; shaft mount speed reducer; v-belt drive; rubber lagged head pulley; self-cleaning tail pulley; pillow block bearings; screw take-up assemblies; CEMA “C” flat belt idlers with 5" diameter rolls mounted on close centers; 3 ply vulcanized endless conveyor belting; OSHA drive, tail and nip guards.

Collecting Conveyor
36" wide with electric motor; shaft mount speed reducer; v-belt drive; rubber lagged head pulley; self cleaning tail pulley; pillow block bearings; screw take-up assemblies; CEMA “C” troughing and return idlers with 5" diameter rolls; conveyor belting with 3/16" x 1/16" rubber covers; OSHA drive, tail and nip guards; 9'-6" long conveyor extension beyond the hoppers which folds for transport.

Structure
Portable trailer or stationary structure constructed of heavy duty wide flange beams; wide flange vertical beams and angle iron cross members tie all hoppers and structure together for optimum rigidity.

Finish
One rust inhibitor prime coat and one finish coat paint.

Rock Systems Model 108
Portable & Stationary
Blending Hopper/Cold Feed Bins

Portable 3 Bin

Portable 4 Bin

Stationary 5 Bin

Options
- Skid Mounted Support Structure
- Electric Motor Controls & Wiring
- Bulkheads
- Bin Dividers
- Grizzly to Remove Oversize Material
- Hopper Liners
- Material Flow Controls
- Side Wall Belting for Feeders
- RAP Bins
- Air Cannons
- Screw Conveyors
- Walkway with Handrails
